

13 October 2015

Dear Sir/Madam,

Thank you for your recent follow-up Freedom of Information request regarding Carboxyhaemoglobin at Homerton Hospital

The Trust can provide the following information:

- **What methods of measuring carboxyhaemoglobin does each hospital covered by the Trust use**

We measure our carboxyhaemoglobin by our point of care blood gas machine, via a venous blood test. At present our VBG machine is a GEM Premier 4000.

- **Whether or not each hospital covered by the Trust has a Masimo Rad-57 Oximeter in its accident and emergency department.**

The Trust does not currently use a pulse oximeter Masimo Rad-57.

If you have any queries about this response please contact the information governance manager at foi@homerton.nhs.uk, in the first instance. If, following that, you still have any concerns, you may contact the Information Commissioner either by letter, FOI/EIR Complaints resolution, Wycliffe House, Water Lane, Wilmslow, Cheshire SM9 5AF, or by email www.informationcommissioner.gov.uk to take them further.
